Fullstack Software Developer

Pune, India

Fund Admin Processing Exchange (APEX):

- Designed and maintained **table-driven workflows** for 10+ **financial products**, improving configurability and increasing process efficiency by **30%**.
- Developed and supported end-to-end **CI/CD pipelines** across 5+ regions using **Docker**, **secret management**, and automated **assembly creation**, minimizing deployment errors.
- Built **dynamic, data-driven UIs** supporting 100+ variable attribute changes with **real-time updates**, enhancing user experience by **40%**.
- Engineered adaptive screen logic to manage 50+ complex inputs using **Oracle DB configurations**, ensuring seamless **real-time data handling**.
- Reduced **deployment time** by **83%** (from 2 hours to 20 minutes) by implementing **Micro-UI architecture** and optimizing **Docker-based deployments**.
- Enforced **code quality** using **Checkstyle**, improved **JUnit** test coverage to **95%**, and integrated **SonarQube** and **Veracode** to reduce vulnerabilities by **50%**.
- Facilitated **Agile delivery** across 3+ **Scrum teams** by managing story assignments, **sprint planning**, and cross-functional collaboration on 5+ major projects.
- Conducted 1000+ **code reviews** and mentored 10+ **junior developers** to ensure high-quality, maintainable code.

Universal Client Manager (UCM):

- Built a centralized **data management service** to consolidate **client and fund data** from 4 sources, ensuring **99.9% accuracy** and consistency.
- Developed an intuitive **web portal** to manage 500+ monthly **data exceptions**, reducing resolution time by **30%**.
- Created a **real-time dashboard** to monitor 10K+ data entries, track 200+ **open exceptions**, and visualize **mnemonic-level insights** for improved visibility.
- Automated generation and delivery of **UCM feed files**, cutting **manual intervention** by **40%** and boosting **data processing efficiency** by **50%**.
- Designed a dedicated **client data module** managing 70+ fields using **Oracle CLOB** and **Angular shared components**, improving maintainability and **access speed** by **35%**.
