Summary

Performance-driven Full Stack Engineer with 3.5+ years of experience at BNY Mellon, specializing in the end-to-end development of **Microservices** and **Micro UI architectures**. Proven expertise in **Java 17, Angular, and GitLab CI/CD**, with a strong focus on leveraging Generative AI (LLMs) to automate DevOps workflows. Expert at bridging complex backend data streams with intuitive, high-performance user interfaces.

Technical Skills

Backend Engineering: Java 11/17, Spring Boot, REST APIs, Apache Kafka, Hibernate/JPA, Python

Frontend Development: Angular (12-18), TypeScript, RxJS, Micro UI Architecture, HTML5/SCSS

DevOps & Automation: GitLab CI/CD Pipelines, Nginx, Docker, Splunk, Bash

Data & Security: Oracle SQL, Veracode, SonarQube, Checkstyle

Productivity & Tools: ELIZA AI (LLM), GitHub Copilot, Jira, Postman, Grafana, App Dynamics, Linux

Experience

Full Stack Software Engineer 2024 – Present
BNY Mellon *Pune, India*

- **Full Stack Infrastructure:** Architected and deployed the **APEX** project, establishing Microservices and Micro UI frameworks using GitLab CI/CD, Nginx, and App Engine across multiple regions.
- **DevOps Automation:** Developed custom **ELIZA AI agents** to automate Merge Request reviews and generate ready-to-execute Python scripts for release tasks, reducing manual deployment effort by 40%.
- **Backend Engineering:** Automated fund and share class data hydration from **BIA feed files**, building robust backend parsers to maintain consistency across accounting modules.
- **Frontend Architecture:** Engineered a dynamic, multi-level hierarchical navigation system adhering to updated brand standards, significantly improving UX for complex administrative mnemonics.
- **Security & Quality:** Remediated critical backend/frontend vulnerabilities identified by **Veracode** and enforced quality gates using custom SonarQube/Checkstyle rules at the pipeline level.
- **Release Management:** Optimized staged deployment pipelines for 16+ interdependent services and integrated real-time application status logging to replace manual verification.

Software Developer 2022 – 2023
BNY Mellon *Pune, India*

- **Backend & Real-time Data:** Built the **SLA Tracker** backend, integrating **Kafka heartbeats** and SOD/EOD data pre-checks to provide real-time operational insights.
- **Frontend Components:** Designed and implemented reusable **Angular shared components** (Stat Cards, SLA Selectors) utilized across the CCN UI project, reducing redundant code by 25%.
- **Data Optimization:** Refactored legacy services to optimize database storage by merging fragmented attributes into **Database CLOBs**, improving backend query performance.
- **Utility Development:** Built the BGF Share Class Utility, integrating **DRV calls** and Investone data to display concise share class counts and detailed exceptions in a compact UI view.
- **Full Stack Reliability:** Achieved **91.2% unit test line coverage** using JUnit 5 and Mockito, while successfully delivering 10+ high-priority JIRA tasks within strict release timelines.
- **Modernization:** Refactored the OSCAR Dashboard from a monolith into standalone services, updating API endpoints and improving UI responsiveness.

Education

MNNIT Allahabad, Prayagraj (U.P.), India May 2022
Bachelor of Technology (Electronics & Communication Engineering) *CGPA: 7.98/10.0*

JNV Sonbhadra (U.P.), India Mar 2018
XII (CBSE) *Percentage: 92.8%*
